```
public class TestClassAdapter
{
    public static void main(String args[])
    {

        ClassAdapter o;
        Set o1;

        o = new ClassAdapter(7);
        o.push(1);
        o.push(2);
        o.push(3);
        o.push(4);
        o.push(5);
        o.push(6);
        o.push(7);

        o1 = o;

        System.out.println(o1.member(5));
        System.out.println(o1.member(7));
        System.out.println(o1.member(5));
        System.out.println(o1.member(9));
        System.out.println(o1.member(1));
         o1.remove(5);
        System.out.println(o1.member(5));
        System.out.println(o1.member(7));
    }
}
```
